zeroswap

How does Zero Swap help a DEX?

MULTICHAIN

Zero Swap is multi-chain enabling seamless, faster, cost efficient transaction or exchanges between various block chains including Ethereum, Binance smart chain, Elrond and many more. So, DEX can be built across multiple chains at ease.

LIQUIDITY AVAILABILITY

Sourcing of liquidity across chains ensures easy availability of liquidity for DEX platforms which makes quick and reliable settlement of transactions

DEVELOPER FRIENDLY APIS

Zero Swap provides developer friendly APIs under ZeeSuite which can be integrated with existing workflows and DEX can be built easily.

DEX AGGREGATION

Zero Swap enables easy access to liquidity on multiple chains from all decentralised liquidity providers

TOKEN OFFERING

With Zeedo, any DEX platform can list their tokens and get the much needed initial visibility and flow.

ZERO TRADE FEES & GASLESS

All transactions on Zero Swap are performed at gasless and zero trade fees. As a result more and more users will be attracted.

MARKET MAKING SUITE - EFFICIENT, RELIABLE AND FASTER

Zero Swap replaces the advantages of Centralised Exchanges at zero transaction charges enabling adaptability by more users.
